Introduction

Jewelers Mutual Insurance Company developed *Inventory Records: It's good business* because proper inventory record keeping is a necessary tool for a jewelry business to be successful.

Taking the time to establish and maintain accurate and up-to-date inventory records will save you time and money in the event of an insurance claim. If you have a loss, your inventory records will prove what inventory has been lost and its value so that your claim can be settled quickly. If you can’t prove that missing items existed, the payment for your loss may be delayed or possibly denied. **In addition, inventory records are required by your insurance policy.**

Recovering insured losses isn’t the only reason to establish proper inventory records. Inventory records are useful in planning. They can indicate when to reorder merchandise and can help you know what’s selling and what’s not. Your records can also alert you to missing items and errors in entry, and they help deter internal theft.

This guide provides information for all segments of the jewelry industry. Because each jewelry operation differs in size, method of operation, and type of finished products, it’s difficult to recommend one inventory system that will work for every firm.

Work with your accountant to create an inventory record keeping system that works for your business. Computer-based inventory systems are affordable and easy to use.

If you have any questions or comments, please contact your agent or Jewelers Mutual’s Sales and Marketing Department.

**Jewelers Mutual Insurance Company**

24 Jewelers Park Drive P.O. Box 468
Neenah, Wisconsin 54957-0468
800-558-6411 Fax: 920-725-9401
JewelersMutual.com | YourInsuranceExpert@jminsure.com
When you manufacture a large quantity of an item and the cost of parts and labor have been recorded, keep a running inventory to track your merchandise as shown below.

Inventory number **ER456**

<table>
<thead>
<tr>

When items are sold, record the inventory number on an appropriate sales form and delete the items from your inventory. (See page 9.)

Inventory number **ER456**

Merchandise temporarily away from your store

Maintain a complete and separate inventory for items that are temporarily away from your premises, whether in your possession or in the hands of an authorized party, such as a commissioned salesperson.

Your inventory records can be recorded in the same manner as on page 11 of this guide.

Inventory records checklist

This checklist will help you determine if your inventory records system follows the recommendations in this program. Consult your accountant for a thorough evaluation of your inventory records system.

- My inventory records contain a detailed listing of all owned stock for sale, customers’ goods, property of others (including customer, consignment, and memo goods) scrap gold and other metals and merchandise temporarily away from my store.

- I keep purchase invoices, sales receipts, inter-store transfer records, and an annual physical inventory list of all my stock.

- I maintain a perpetual inventory system or an equivalent system.

- I update my records regularly.

- I am exact and accurate in my record keeping.

- I perform a detailed and itemized listing of my physical inventory at least once a year. Inventory or jewelry lines carried by sales people are included in the annual physical inventory.

- My accountant has reviewed my inventory system.

- I store a copy of my annual physical inventory records off premises.

- For my computer-based perpetual inventory system, I back up my files on removable media and store the media at another site.

- If I use a manual perpetual inventory system, I keep my records separate from my merchandise.

- I store all of my records, including purchase invoices and sales receipts, in a fireproof container or safe that does not hold merchandise.

- I keep a copy of the physical inventory used to report inventory value on the Jewelers Pak application.

Finished goods

Record all jewelry items that have been completely manufactured in the finished goods category. Assign an inventory number to each item. The following examples can be used to track custom-made items or similar items that are mass-produced. Your inventory records should include each item’s value, which includes cost of component parts and labor.
Inventory record keeping requirements

To comply with the inventory record keeping requirement of your Jewelers Block policy, you must do the following:

1. Take a detailed and itemized inventory every 12 months.
   Jewelers Mutual defines a detailed and itemized inventory as including, but not limited to:
   a. A listing that describes merchandise and links items to their original source documents (i.e., purchase invoices).
   b. The value* of each item at your cost.
   c. The date the inventory was taken.
   d. The exact total value of all inventory items; not a rounded or estimated value.
   e. The exact quantity (number of units or number of grams) of each item.

2. Maintain purchase invoices of all items.

3. Maintain a record of the cost of component parts for manufactured (assembled) items.

4. Maintain sales receipts that identify items sold by inventory numbers, descriptions, or some other method that will trace the items to the listing of the physical inventory and the original source documents (i.e., purchase invoices).

Sample inventory record format

With this information, you can maintain accurate inventory records. You can add other columns to your records if you feel it will help track merchandise. Additional columns could include manufacturing style number; manufacturer invoice number; type of metal (14k gold, platinum, silver, etc.); type and weight of stones; customer’s name; selling price of item; and method of payment.

* Throughout this guide, value is defined as your actual cost.
Storing inventory records

Keep your inventory records for a minimum of seven years. If you have stock that is older than seven years, keep the inventory records for that stock until the items have been sold.

If you have a manual inventory system, keep your records separate from your merchandise to minimize the chance of your records being stolen. For a computer-based system, back up your files on removable media and store the media at a location away from your business.

Store your inventory records, including purchase invoices and sales receipts, in a fireproof container or safe that does not hold merchandise.

Keep copies of your two most recent annual physical inventories away from your business, such as at your home, a bank vault, or your accountant’s office.

Developing a perpetual inventory system

A perpetual inventory system tracks every item for sale, from the time you receive the merchandise until you are no longer responsible for it. Some items—such as low-valued merchandise, raw materials and parts, chains sold by the gram—have different record keeping requirements, which are described later in this guide under “Merchandise requiring special records.”

In conjunction with the perpetual inventory system, you should retain:

1. Purchase invoices
2. Sales receipts
3. Your annual detailed and itemized physical inventory

To track your merchandise effectively, maintain your perpetual inventory on a daily basis. In addition to keeping records of your own merchandise, keep an up-to-date detailed listing of:

1. Your customers’ goods, if you are a retail jeweler
2. Merchandise that belongs to others in the jewelry business (consigned or memo goods)
3. Items that are temporarily away from your business

Take a physical inventory at least once a year. If you update your records regularly, your perpetual inventory should match your physical inventory. Keep a copy of any adjusting entry necessary to balance the perpetual to the physical inventory.

Unique inventory numbering

Develop an inventory identification system that assigns a unique inventory number to each piece of jewelry. Even though two items may have identical makes and prices—for example, two watches—each should receive its own inventory number. One exception is computerized systems that inventory merchandise by using stock-keeping units (SKU).

b. The value of raw materials and parts, samples, finished goods, and merchandise

c. The date the inventory was taken

d. The exact total value of all inventory items; not a rounded or estimated value. Inventory or jewelry lines carried by sales people must be included in the annual physical inventory

2. Maintain purchase invoices of raw materials and merchandise

3. Maintain sales receipts, which identify items sold by inventory numbers, descriptions, or some other method that will trace the items to the listing of the physical inventory and the original source documents (i.e., purchase invoices)

Depending upon your business, you should also keep a detailed list of merchandise that

• Belongs to others in the jewelry industry, and
• Is temporarily away from your business, whether in your possession or in the hands of an authorized party

Assign inventory numbers to your merchandise. Inventory numbers can be established as described on page 7. You can create inventory numbers of categories, such as type of merchandise (gold, loose diamonds, etc.) or supplier. Use a method that works best for your business.

Assign inventory numbers in sequence by number, letter, and or letter/number combination. Be sure to develop consistent codes that are easy for you and your employees to understand and remember.

Raw materials and parts

Raw materials and parts include precious metals, plate, tubing, shot, findings, unset mountings, and similar materials used to manufacture jewelry. It’s easiest to inventory this type of property by weight. As material is used, subtract the weight from the inventory. When new material is purchased, add the weight. Additions, subtractions and balances should be recorded daily, as shown below.

| Type of metal | Gold | Inventory number | G-MR100 |

<table>
<thead>
<tr>
<th>Date</th>
<th>Supplier</th>
<th>Value at Cost</th>
<th>Gram Weight</th>
</tr>
</thead>
<tbody>
<tr>
<td>12/11/18</td>
<td>Metal Refiners</td>
<td>1,215.00</td>
<td>27 gm</td>
</tr>
<tr>
<td>12/12/18</td>
<td>765.00</td>
<td>17 gm</td>
<td>225 gm</td>
</tr>
</tbody>
</table>
Step Five: After all items have been inventoried, complete a cover sheet, similar to the one below. (See page 7 for descriptions of category codes.)

---

**TOTAL** $ 

**Price of gold 12/31/YR.** $ 

**Perpetual total** $ 

**Difference** $ 

Signature of Authorized Representative

---

Step Six: Compare the perpetual inventory value to the physical total.

Step Seven: Store your annual physical inventory in a fire-resistant container or safe that does not hold merchandise. Keep a copy of the last two annual physical inventory in a safe place away from your business, such as at your home, accountant’s or bookkeeper’s office, or in a bank safe deposit box. You will need the exact total for your Jewelers Block insurance application or renewal.

**MANUFACTURING AND WHOLESALE JEWELERS**

Jewelry manufacturers and wholesalers differ in size, method of operation, and type of finished products. It’s difficult to recommend one inventory system that will work for every firm. Many of the recommendations listed earlier in this guide apply to manufacturers and wholesalers; some do not. Jewelers Mutual offers the following as specific recommendations for manufacturers and wholesalers. Jewelers Mutual strongly recommends that you consult with a professional accountant when establishing or reviewing your inventory record keeping procedures.

1. Take a detailed and itemized inventory once a year.

   Jewelers Mutual defines a detailed and itemized inventory as including, but not limited to:

   a. A listing, which describes raw materials and parts, samples, finished goods, and merchandise in such a manner that will trace items to the original source documents (i.e., purchase invoices)

   Similar items are given the same SKU number and tracked by quantity. This is an acceptable inventory method.

   Inventory numbers should be assigned in sequence by number, letter, or letter/number combination. The letter/number system allows you to identify your inventory by categories. For example, a gold chain could be CH100; a wedding ring could be WR100.

**Inventory codes for categories**

You can assign a code to each category of merchandise. Codes also can be used to refer to specific suppliers. Develop codes that are easy for you and your employees to understand and remember. To be effective, you must use these codes consistently. The following are commonly used codes and their categories:

- **BRC** Bracelets
- **CHR** Charms
- **CR** Rings with colored stones
- **CL** Clocks
- **G** Giftware
- **ER** Rings (engagement)
- **GT** Gent’s jewelry
- **GR** Gent’s rings
- **F** Mountings and findings
- **R** Rings (gold)
- **NECK** Necklaces
- **DEF** Rings (diemonds)
- **CH** Gold chains
- **PD** Pendants
- **WR** Wedding rings
- **CS** Stones (loose colored)
- **WG** Watches (gents)
- **D** Diamonds (loose diamonds)
- **WL** Watches (ladies)

You may need other categories or subcategories. For instance, under Category D, Stones (loose diamonds), you may want to add a separate listing for diamonds by clarity.

- **D.0** Flawless
- **D.1** Internally flawless
- **D.2** VVS1
- **D.3** VVS2
- **D.4** VS1
- **D.5** VS2
- **D.6** SI1
- **D.7** SI2
- **D.8** I1
- **D.9** I2
- **D.10** I3

You could refine these subcategories further by including the color of the stones—which should be indicated regardless of clarity—in each subcategory:

- **D.41** D
- **D.42** E
- **D.43** F
- **D.44** G

Under each of these headings, you can list all diamonds of that color and clarity according to cut and carat weight.
Step-by-step process for creating a perpetual inventory system

1. When a new piece of merchandise arrives, compare the purchase invoice to the merchandise to make certain you received the correct item.

2. Assign a unique inventory number or number/letter combination, based on your inventory identification system and record the inventory number in the perpetual inventory system, along with the following:
   a. A description of the item
   b. The date the item was received
   c. Your cost for the item
   d. The manufacturer's name
   e. The quantity or weight

3. Record the inventory number on the purchase invoice that you received with the merchandise and file the purchase invoice.

4. Record the inventory number on the sales tag for the item. Information on the sales tag will help track merchandise to the purchase invoice and perpetual inventory. In addition to the inventory number, you may want to include the following information on the sales tag:
   a. Unique inventory number
   b. Cost code for items
   c. Category code
   d. Retail price
   e. Carat weight, color, clarity of stones
   f. Supplier code

5. When an item of jewelry is sold, record the inventory number, date of sale, customer's name and address, and selling price on the sales receipt. (See sample on the next page.) It may also be helpful to record a brief description of the item on the sales receipt. Instead of writing the information on the sales receipt, some jewelers attach the sales tag to the receipt.

   The sales receipt should be a three-part form. Enter the date of the sale into the perpetual inventory system. Most jewelers also enter the sale price and divide the form accordingly.
   a. Part one goes to the customer;
   b. Part two is filed for inventory purposes; and
   c. Part three goes to your accountant or bookkeeper.

Recording an annual physical inventory

You now have the necessary tools to establish and maintain detailed, accurate records. If you do not have an acceptable perpetual inventory system, now is the best time to develop one. If you update your records regularly, your perpetual inventory should match your annual physical inventory.

Step One: Begin with all of your stock labeled, identified and priced. Your sales tags should include category numbers which indicate the type of merchandise. Category numbers are helpful because it's convenient to record your annual physical inventory by category. Keep a separate record for each category.

Sales staff jewelry lines and scrap gold measurements should be included in the annual physical inventory.

Step Two: Gather all merchandise from each category into separate areas. This prevents the need to re-inventory categories if merchandise is missing.

Step Three: It's best to work in teams of two, with one person reading the tags and another person recording the information onto separate inventory records either on paper or by computer.

The annual physical inventory should include the date the inventory was taken, the category number, and each item's inventory number, quantity, and brief description, as shown on the next page.

There is no need to provide complete descriptions of items listed in your annual physical inventory. The inventory number is sufficient to find the purchase invoice, which gives a complete description of that item.

<table>
<thead>
<tr>
<th>Category #: CH</th>
<th>Inventory date: 12/31/YR</th>
</tr>
</thead>
<tbody>
<tr>
<td>Employee: Jeff Brown</td>
<td>Date: 12/31/YR</td>
</tr>
<tr>
<td>Checked by: Sue Phillips</td>
<td>Date: 12/31/YR</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Inventory #</th>
<th>Quantity</th>
<th>Description</th>
<th>Cost</th>
</tr>
</thead>
<tbody>
<tr>
<td>CH102</td>
<td>1</td>
<td>24&quot; gold chain</td>
<td>5.5gr</td>
</tr>
<tr>
<td>CH103</td>
<td>1</td>
<td>18&quot; gold chain</td>
<td>2.3gr</td>
</tr>
<tr>
<td>CH105</td>
<td>1</td>
<td>18&quot; gold chain</td>
<td>3.3gr</td>
</tr>
</tbody>
</table>

Step Four: When a category has been inventoried, check it for accuracy. If the number of items and dollar values match, place the merchandise in the safe, vault, or under your showcases. This prevents merchandise from being inadvertently recounted or mixed into other categories.
Customer-returned merchandise

If a customer returns an item, re-enter the item in your perpetual system in one of two ways.

1. Locate the returned item’s inventory number in your perpetual inventory. In the Date of Sale column, mark the item returned and record the return date. Keep the original inventory number for the returned piece.

2. Create a new inventory number for the returned item, but note in your perpetual inventory that the item was returned and include the old inventory number.

Giftware, charms, fashion jewelry

Record the quantity of these items on your inventory. Although identification of each item is not required, maintain all documents for these items. The sales tag should include the category number of the item, its cost, and gram or carat weight if applicable.

Sale of items that do not have unique inventory numbers

When you sell gold, diamonds, giftware, charms, or other items that do not have a unique inventory number, record the gram, carat weight, or quantity on a sales receipt, so it can be subtracted from the running inventory record. In addition, record the date of the sale, customer’s name and address, a brief description, and selling price on the sales receipt.

Record the lot of diamonds in your perpetual inventory as follows:

<table>
<thead>
<tr>
<th>Date</th>
<th>In</th>
<th>Out</th>
<th>Balance</th>
<th>Cost Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>9/3/YR</td>
<td>4</td>
<td></td>
<td>200.00</td>
<td></td>
</tr>
<tr>
<td>12/12/YR</td>
<td>20</td>
<td>24</td>
<td>1,200.00</td>
<td></td>
</tr>
<tr>
<td>(physical inventory)</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>1/14/YR</td>
<td>3</td>
<td>21</td>
<td>1,050.00</td>
<td></td>
</tr>
<tr>
<td>3/9/YR</td>
<td>27</td>
<td>48</td>
<td>2,400.00</td>
<td></td>
</tr>
</tbody>
</table>

Record the following items in your perpetual inventory:

- Giftware, charms, fashion jewelry
- Record the quantity of these items on your inventory. Although identification of each item is not required, maintain all documents for these items. The sales tag should include the category number of the item, its cost, and gram or carat weight if applicable.

Sale of items that do not have unique inventory numbers

When you sell gold, diamonds, giftware, charms, or other items that do not have a unique inventory number, record the gram, carat weight, or quantity on a sales receipt, so it can be subtracted from the running inventory record. In addition, record the date of the sale, customer’s name and address, a brief description, and selling price on the sales receipt.

Record the lot of diamonds in your perpetual inventory as follows:

<table>
<thead>
<tr>
<th>Date</th>
<th>In</th>
<th>Out</th>
<th>Balance</th>
<th>Cost Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>9/3/YR</td>
<td>4</td>
<td></td>
<td>200.00</td>
<td></td>
</tr>
<tr>
<td>12/12/YR</td>
<td>20</td>
<td>24</td>
<td>1,200.00</td>
<td></td>
</tr>
<tr>
<td>(physical inventory)</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>1/14/YR</td>
<td>3</td>
<td>21</td>
<td>1,050.00</td>
<td></td>
</tr>
<tr>
<td>3/9/YR</td>
<td>27</td>
<td>48</td>
<td>2,400.00</td>
<td></td>
</tr>
</tbody>
</table>

Giftware, charms, fashion jewelry

Record the quantity of these items on your inventory. Although identification of each item is not required, maintain all documents for these items. The sales tag should include the category number of the item, its cost, and gram or carat weight if applicable.

Sale of items that do not have unique inventory numbers

When you sell gold, diamonds, giftware, charms, or other items that do not have a unique inventory number, record the gram, carat weight, or quantity on a sales receipt, so it can be subtracted from the running inventory record. In addition, record the date of the sale, customer’s name and address, a brief description, and selling price on the sales receipt.

Record the lot of diamonds in your perpetual inventory as follows:

<table>
<thead>
<tr>
<th>Date</th>
<th>In</th>
<th>Out</th>
<th>Balance</th>
<th>Cost Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>9/3/YR</td>
<td>4</td>
<td></td>
<td>200.00</td>
<td></td>
</tr>
<tr>
<td>12/12/YR</td>
<td>20</td>
<td>24</td>
<td>1,200.00</td>
<td></td>
</tr>
<tr>
<td>(physical inventory)</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>1/14/YR</td>
<td>3</td>
<td>21</td>
<td>1,050.00</td>
<td></td>
</tr>
<tr>
<td>3/9/YR</td>
<td>27</td>
<td>48</td>
<td>2,400.00</td>
<td></td>
</tr>
</tbody>
</table>
Merchandise transferred between stores (retail)

When transferring items between stores, complete a transfer document. (See sample on the next page.) Use a three-part form or make three copies. One copy remains with the sending location; one copy is sent with the jewelry to the receiving location; and the third copy is forwarded to the home office, accountant, or bookkeeper.

| FROM: Gold Mine Jewelers (Location #1) | 123 Oak St. | Madison, WI 54321 |
| TO: Gold Mine Jewelers (Location #2) | 321 Main St. | Portage, WI 53023 |

<table>
<thead>
<tr>
<th>Date of Sale</th>
<th>Inventory #</th>
<th>Description</th>
<th>Cost</th>
</tr>
</thead>
<tbody>
<tr>
<td>3/1/YR</td>
<td>GT3</td>
<td>14K Gold Cufflinks</td>
<td>399.00</td>
</tr>
<tr>
<td>3/1/YR</td>
<td>EAR36</td>
<td>14K Gold Earrings</td>
<td>225.00</td>
</tr>
<tr>
<td>3/1/YR</td>
<td>GR12</td>
<td>14K Men’s Wedding Ring</td>
<td>499.00</td>
</tr>
<tr>
<td>3/1/YR</td>
<td>CR23</td>
<td>18K Amethyst Ring</td>
<td>599.00</td>
</tr>
</tbody>
</table>

Record the transfer in each store’s perpetual inventory system. Location 1 should record the transfer as a sale, as shown below. In the Date of Sale column, add a code that indicates transfer. For example, T2 indicates transfer to the second location.

**Men’s Jewelry (Category-GT)**

<table>
<thead>
<tr>
<th>Inventory Number</th>
<th>Description</th>
<th>Date Received</th>
<th>Cost</th>
<th>Manufacturer’s Name</th>
</tr>
</thead>
<tbody>
<tr>
<td>GT1</td>
<td>14K Onyx Cufflinks</td>
<td>1/17/YR</td>
<td>200.00</td>
<td>Adams Mfg.</td>
</tr>
<tr>
<td>GT2</td>

<td>2/1/YR</td>
<td>105.00</td>
<td>Metals Inc.</td>
</tr>
<tr>
<td>GT3</td>
<td>14K Gold Cufflinks</td>
<td>2/15/YR</td>
<td>400.00</td>
<td>Adams Mfg.</td>
</tr>
</tbody>
</table>

Since Location 2 is receiving the merchandise, Location 2 should treat the transfer as a purchase. In the following example, the transfer is recorded in the Manufacturer’s Name column as T1, which indicates the item was transferred from Location 1.

**Men’s Jewelry (Category-GT)**

<table>
<thead>
<tr>
<th>Inventory Number</th>
<th>Description</th>
<th>Date Received</th>
<th>Cost</th>
<th>Manufacturer’s Name</th>
</tr>
</thead>
<tbody>
<tr>
<td>GT3</td>
<td>14K Gold Cufflinks</td>
<td>3/01/YR</td>
<td>400.00</td>
<td>T1</td>
</tr>
</tbody>
</table>

Loose diamonds and colored stones purchased in bulk

Maintain a separate ledger for loose diamonds and colored stones.

.20 carats and more: These stones should have individual inventory numbers. (See page 7 in this guide for information about establishing category codes.) Recording merchandise by individual inventory numbers is shown on the next page.

**Stones - Loose Diamonds (Category D.11)**

</tr>
</tbody>
</table>

Keep a copy of this inventory listing at your store or home office. A copy also should be given to the authorized person who will carry the merchandise. Any activity, such as sales or memorandums to potential clients, should be recorded on this separate inventory listing. Remember to include these items in the annual inventory for your business.

Merchandise that is not invoiced at the time of receipt

You may receive items that are not invoiced by the supplier until you decide to keep them or they are sold. In these circumstances, it’s important to retain packing slips from the supplier and any identification numbers from packages, such as air bills or shipper numbers. If a loss occurs, these records could be used to determine which non-invoiced items from the supplier were in your possession.

Custom-made jewelry

If you custom make jewelry, record the following in your perpetual inventory:
1. Cost of component parts
2. Supplier of component parts
3. Invoice number of component parts
4. Value of your time to design and manufacture the item
5. Date when the item was completed

As an alternative, you can value custom-made items based on your wholesale price (the price you offer retailers) minus your profit percentage.

Gold chains and jewelry bought and sold by the gram

Maintain a separate ledger for inventorying gold that is bought and sold by the gram. Keep a running total of gram weight for various types of gold, such as 14K or 18K gold. This system is similar to balancing a checkbook.

</tbody>
</table>

When accepting an item, check it for damage. Missing prongs, chipped or cracked stones, cracks in shanks, missing stones, etc., should be noted on the job form. When describing the item, give only a general description. For example, use the term “white stone” instead of “diamond” or “yellow band” instead of “14K yellow gold band.” This could prevent you from having to replace a cubic zirconium with a diamond, in case of a loss.

If the customer does not want to assign a value, you may leave the line blank. The description of the item will be used in the event of a claim.

Note: If the customer assigns a value that you think is too high, there are two alternatives you may want to consider:
1. Tell the customer what you think the item is worth and ask the customer to assign that value to the item.
2. You may decide to decline the job if the customer insists on overvaluing the item.

Overvaluing can be an indication that you are being set up for a loss or complaint.

Merchandise requiring special inventory records

The following items require special documentation:

### Pawned items

Record pawned items in the manner that meets the requirements of your local and state laws. For insurance purposes, maintain a record for pawned items that includes:

1. Name and address of the person who pawned the item
2. Date the item was received
3. Description of the item
4. Dollar value of the loan, plus accrued interest

<table>

</tbody>
</table>

Keep a copy of this inventory listing at your store or home office. A copy also should be given to the authorized person who will carry the merchandise. Any activity, such as sales or memorandums to potential clients, should be recorded on this separate inventory listing. Remember to include these items in the annual inventory for your business.

All merchandise that is not sold should be re-inventoried when returned to your business. In addition, sold items, memorandum goods, etc., should be reconciled to ensure your inventory is accurate. Inventory or jewelry lines carried by sales people must be included in the annual physical inventory.
Pawned items in default
After you take legal title to a pawned item, the item should be recorded and reported as owned inventory. The values assigned should be your estimated replacement cost value. Any item that is valued at more than $1,000 should be professionally appraised. Keep this appraisal with your inventory records.

Estate merchandise
If you purchase estate merchandise or other jewelry from a private party (non-jeweler) for resale, you must be able to verify the existence and value of this property in the event of a claim.

To document the existence and value of the property, record the following information at the time of acquisition:

1. Name, address, telephone number, and driver’s license of the seller.
2. A detailed and itemized list of all items sold to you. This list should include a description of each item, your cost for each item, the date purchased, and the name of the seller. You should obtain professional appraisals for any items with values of more than $1,000.
3. The canceled check used to make the purchase. If cash is used to make the purchase, you should keep records that will identify the source of the cash and the exact amount of the purchase price.
4. In a barter situation, you should keep a specific listing that identifies all of the items and values involved in the complete transaction.

Memo/consignment merchandise
If you take in items on memo, obtain a description and value for each item from the seller, a copy of the memo agreement, and the seller’s name, address, and phone number. When you accept items on consignment from a customer, the consignment agreement must show the value the customer will receive when the items have been sold. Also, maintain records of items that are sold or returned to the consignor or the person who gave you the items on memo.

Check with your local authorities about any regulations concerning the purchase and resale of this type of property. Also contact your attorney to create a legally binding consignment or memo agreement that includes a legal paragraph describing the terms of the agreement.

In the event of a loss, your policy specifies that Jewelers Mutual will pay policyholders the smallest of the amounts shown below:

1. Your original cost for the property, unless you have valued this property higher or lower on your last written physical inventory as reported on the application attached to your policy
2. The cost to repair, replace, or rebuild the covered property with material of like kind and quality
3. The limit of insurance

Scrap gold and other metals
If you purchase jewelry from consumers with the intent to resell it to a refiner, you can insure the metals at 1) your purchase price, 2) the market value, or 3) the refiner’s confirmed purchase price. Most insurance companies will pay a claim based on how you reported the value in your inventory and on your insurance application or renewal.

As the only insurer exclusively dedicated to insuring jewelry and jewelry businesses, Jewelers Mutual offers its insureds a Scrap Gold and Metals Coverage Option.

To insure scrap gold and other metals at market prices, you must:

- Determine the value of scrap gold and other metals on premises based on current market prices and enter that value in your inventory for insurance purposes.
- Report that value to Jewelers Mutual on your insurance application or renewal. To add coverage at the market price before your policy renews, contact your agent with the highest daily value. Your agent will inform you of the additional premium charge for your approval.
- Keep a daily log that includes the weight of scrap gold purchased during the day and the market value as of that day. Local, state, and federal requirements may specify a more detailed log. Jewelers Mutual has created a Scrap Gold-Metals Worksheet that can help you track the information necessary to insure scrap metals at market prices. The worksheet is available from your agent or on Jewelers Mutual’s website: JewelersMutual.com. Click on Business Jewelry Insurance> Policyholder Info>Inventory Record Keeping>Scrap Gold Worksheet.

The Scrap Gold and Metals Coverage Option does not apply to 1) estate jewelry that you will resell to the public, 2) consigned jewelry, 3) pawned jewelry, or 4) gold or other metals acquired and stored as an investment.

Customer repairs
When a customer brings an item for repair, record information on a three-part, carbonless job form or envelope. On the form or envelope, record the following:

- Customer’s name
- Address
- Phone number
- Description of the item
- Work to be completed
- Estimated cost for the repair
- Customer’s signature
- Date the item was received

Give one copy of the form to the customer, leave one copy with the merchandise, and place the third copy with your inventory records, which are stored separately from your merchandise. Jewelers Mutual also recommends that you keep a separate record in a ledger book or computer record.
Pawned items in default
After you take legal title to a pawned item, the item should be recorded and reported as owned inventory. The values assigned should be your estimated replacement cost value. Any item that is valued at more than $1,000 should be professionally appraised. Keep this appraisal with your inventory records.

Estate merchandise
If you purchase estate merchandise or other jewelry from a private party (non-jeweler) for resale, you must be able to verify the existence and value of this property in the event of a claim.

To document the existence and value of the property, record the following information at the time of acquisition:

1. Name, address, telephone number, and driver’s license of the seller.
2. A detailed and itemized list of all items sold to you. This list should include a description of each item, your cost for each item, the date purchased, and the name of the seller. You should obtain professional appraisals for any items with values of more than $1,000.
3. The canceled check used to make the purchase. If cash is used to make the purchase, you should keep records that will identify the source of the cash and the exact amount of the purchase price.
4. In a barter situation, you should keep a specific listing that identifies all of the items and values involved in the complete transaction.

Memo/consignment merchandise
If you take in items on memo, obtain a description and value for each item from the seller, a copy of the memo agreement, and the seller’s name, address, and phone number. When you accept items on consignment from a customer, the consignment agreement must show the value the customer will receive when the items have been sold. Also, maintain records of items that are sold or returned to the consignor or the person who gave you the items on memo.

Check with your local authorities about any regulations concerning the purchase and resale of this type of property. Also contact your attorney to create a legally binding consignment or memo agreement that includes a legal paragraph describing the terms of the agreement.

In the event of a loss, your policy specifies that Jewelers Mutual will pay policyholders the smallest of the amounts shown below:

1. Your original cost for the property, unless you have valued this property higher or lower on your last written physical inventory as reported on the application attached to your policy
2. The cost to repair, replace, or rebuild the covered property with material of like kind and quality
3. The limit of insurance

Scrap gold and other metals
If you purchase jewelry from consumers with the intent to resell it to a refiner, you can insure the metals at 1) your purchase price, 2) the market value, or 3) the refiner’s confirmed purchase price. Most insurance companies will pay a claim based on how you reported the value in your inventory and on your insurance application or renewal.

As the only insurer exclusively dedicated to insuring jewelry and jewelry businesses, Jewelers Mutual offers its insureds a Scrap Gold and Metals Coverage Option.

To insure scrap gold and other metals at market prices, you must:

- Determine the value of scrap gold and other metals on premises based on current market prices and enter that value in your inventory for insurance purposes.
- Report that value to Jewelers Mutual on your insurance application or renewal. To add coverage at the market price before your policy renews, contact your agent with the highest daily value. Your agent will inform you of the additional premium charge for your approval.
- Keep a daily log that includes the weight of scrap gold purchased during the day and the market value as of that day. Local, state, and federal requirements may specify a more detailed log. Jewelers Mutual has created a Scrap Gold-Metals Worksheet that can help you track the information necessary to insure scrap metals at market prices. The worksheet is available from your agent or on Jewelers Mutual’s website: JewelersMutual.com. Click on Business Jewelry Insurance>Policyholder Info>Inventory Record Keeping>Scrap Gold Worksheet.

The Scrap Gold and Metals Coverage Option does not apply to 1) estate jewelry that you will resell to the public, 2) consigned jewelry, 3) pawned jewelry, or 4) gold or other metals acquired and stored as an investment.

Customer repairs
When a customer brings an item for repair, record information on a three-part, carbonless job form or envelope. On the form or envelope, record the following:

- Customer’s name
- Address
- Phone number
- Description of the item
- Customer’s estimate of the item’s value
- Work to be completed
- Estimated cost for the repair
- Customer’s signature
- Date the item was received

Give one copy of the form to the customer, leave one copy with the merchandise, and place the third copy with your inventory records, which are stored separately from your merchandise. Jewelers Mutual also recommends that you keep a separate record in a ledger book or computer record.
When accepting an item, check it for damage. Missing prongs, chipped or cracked stones, cracks in shanks, missing stones, etc., should be noted on the job form. When describing the item, give only a general description. For example, use the term “white stone” instead of “diamond” or “yellow band” instead of “14k yellow gold band.” This could prevent you from having to replace a cubic zirconium with a diamond, in case of a loss.

If the customer does not want to assign a value, you may leave the line blank. The description of the item will be used in the event of a claim.

Note: If the customer assigns a value that you think is too high, there are two alternatives you may want to consider:
1. Tell the customer what you think the item is worth and ask the customer to assign that value to the item.
2. You may decide to decline the job if the customer insists on overvaluing the item.

Overvaluing can be an indication that you are being set up for a loss or complaint.

Merchandise that is not invoiced at the time of receipt
You may receive items that are not invoiced by the supplier until you decide to keep them or they are sold. In these circumstances, it’s important to retain packing slips from the supplier and any identification numbers from packages, such as air bills or shipper numbers. If a loss occurs, these records could be used to determine which non-invoiced items from the supplier were in your possession.

Custom-made jewelry
If you custom make jewelry, record the following in your perpetual inventory:
1. Cost of component parts
2. Supplier of component parts
3. Invoice number of component parts
4. Value of your time to design and manufacture the item
5. Date when the item was completed

As an alternative, you can value custom-made items based on your wholesale price (the price you offer retailers) minus your profit percentage.

Gold chains and jewelry bought and sold by the gram
Maintain a separate ledger for inventorying gold that is bought and sold by the gram. Keep a running total of gram weight for various types of gold, such as 14K or 18K gold. This system is similar to balancing a checkbook.

</tr>
<tr>
<td>7/15/02</td>
<td>BRC6</td>
<td>18K Bangle Bracelet</td>
<td>500.00</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Keep a copy of this inventory listing at your store or home office. A copy also should be given to the authorized person who will carry the merchandise. Any activity, such as sales or memorandums to potential clients, should be recorded on this separate inventory listing. Remember to include these items in the annual inventory for your business.

All merchandise that is not sold should be re-inventoried when returned to your business. In addition, sold items, memorandum goods, etc., should be reconciled to ensure your inventory is accurate. Inventory or jewelry lines carried by sales people must be included in the annual physical inventory.

Recording a change in value
If your replacement cost increases or decreases for certain items in your inventory, Jewelers Mutual permits you to amend their values on the next physical inventory that you conduct and provide to the insurance company as the basis for your premium.

If you follow these record keeping guidelines, and you maintain and update your system on a regular basis, you will meet the inventory record keeping requirement of your policy.

Merchandise requiring special inventory records
The following items require special documentation:

Pawned items
Record pawned items in the manner that meets the requirements of your local and state laws. For insurance purposes, maintain a record for pawned items that includes:
1. Name and address of the person who pawned the item
2. Date the item was received
3. Description of the item
4. Dollar value of the loan, plus accrued interest
Merchandise transferred between stores (retail)

When transferring items between stores, complete a transfer document. (See sample on the next page.) Use a three-part form or make three copies. One copy remains with the sending location; one copy is sent with the jewelry to the receiving location; and the third copy is forwarded to the home office, accountant, or bookkeeper.

FROM: Gold Mine Jewelers (Location #1)
123 Oak St.
Madison, WI 54321

TO: Gold Mine Jewelers (Location #2)
321 Main St.
Portage, WI 53023

<table>
<thead>
<tr>
<th>Date</th>
<th>Inventory #</th>
<th>Description</th>
<th>Cost</th>
</tr>
</thead>
<tbody>
<tr>
<td>3/1/YR</td>

Customer-returned merchandise

If a customer returns an item, re-enter the item in your perpetual system in one of two ways.

1. Locate the returned item's inventory number in your perpetual inventory. In the Date of Sale column, mark the item returned and record the return date. Keep the original inventory number for the returned piece.

2. Create a new inventory number for the returned item, but note in your perpetual inventory that the item was returned and include the old inventory number.

Giftware, charms, fashion jewelry

Record the quantity of these items on your inventory. Although identification of each item is not required, maintain all documents for these items. The sales tag should include the category number of the item, its cost, and gram or carat weight if applicable.

Sale of items that do not have unique inventory numbers

When you sell gold, diamonds, giftware, charms, or other items that do not have a unique inventory number, record the gram, carat weight, or quantity on a sales receipt, so it can be subtracted from the running inventory record. In addition, record the date of the sale, customer's name and address, a brief description, and selling price on the sales receipt.

Step-by-step process for creating a perpetual inventory system

1. When a new piece of merchandise arrives, compare the purchase invoice to the merchandise to make certain you received the correct item.

2. Assign a unique inventory number or number/letter combination, based on your inventory identification system and record the inventory number in the perpetual inventory system, along with the following:
   a. A description of the item
   b. The date the item was received
   c. Your cost for the item
   d. The manufacturer's name
   e. The quantity or weight

3. Record the inventory number on the purchase invoice that you received with the merchandise and file the purchase invoice.

4. Record the inventory number on the sales tag for the item. Information on the sales tag will help track merchandise to the purchase invoice and perpetual inventory. In addition to the inventory number, you may want to include the following information on the sales tag:
   a. Unique inventory number
   b. Cost code for items
   c. Category code
   d. Retail price
   e. Carat weight, color, clarity of stones
   f. Supplier code

5. When an item of jewelry is sold, record the inventory number, date of sale, customer’s name and address, and selling price on the sales receipt. (See sample on the next page.) It may also be helpful to record a brief description of the item on the sales receipt. Instead of writing the information on the sales receipt, some jewelers attach the sales tag to the receipt.

The sales receipt should be a three-part form. Enter the date of the sale into the perpetual inventory system. Most jewelers also enter the sale price and divide the form accordingly.
   a. Part one goes to the customer;
   b. Part two is filed for inventory purposes; and
   c. Part three goes to your accountant or bookkeeper.

Recording an annual physical inventory

You now have the necessary tools to establish and maintain detailed, accurate records. If you do not have an acceptable perpetual inventory system, now is the best time to develop one. If you update your records regularly, your perpetual inventory should match your annual physical inventory.

Step One: Begin with all of your stock labeled, identified and priced. Your sales tags should include category numbers which indicate the type of merchandise. Category numbers are helpful because it’s convenient to record your annual physical inventory by category. Keep a separate record for each category.

Sales staff jewelry lines and scrap gold measurements should be included in the annual physical inventory.

Step Two: Gather all merchandise from each category into separate areas. This prevents the need to re-inventory categories if merchandise is missing.

Step Three: It’s best to work in teams of two, with one person reading the tags and another person recording the information onto separate inventory records either on paper or by computer.

The annual physical inventory should include the date the inventory was taken, the category number, and each item’s inventory number, quantity, and brief description, as shown on the next page.

There is no need to provide complete descriptions of items listed in your annual physical inventory. The inventory number is sufficient to find the purchase invoice, which gives a complete description of that item.

<table>
<thead>

<th>Category #: CH</th>
<th>Inventory date: 12/31/YR</th>
</tr>
</thead>
<tbody>
<tr>
<td>Employee: Jeff Brown</td>
<td>Date: 12/31/YR</td>
</tr>
<tr>
<td>Checked by: Sue Phillips</td>
<td>Date: 12/31/YR</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Inventory #</th>
<th>Quantity</th>
<th>Description</th>
<th>Cost</th>
</tr>
</thead>
<tbody>
<tr>
<td>CH102</td>
<td>1</td>
<td>24&quot; gold chain</td>
<td>5.5gr</td>
</tr>
<tr>
<td>CH103</td>
<td>1</td>
<td>18&quot; gold chain</td>
<td>2.3gr</td>
</tr>
<tr>
<td>CH105</td>
<td>1</td>
<td>18&quot; gold chain</td>
<td>3.3gr</td>
</tr>
</tbody>
</table>

Step Four: When a category has been inventoried, check it for accuracy. If the number of items and dollar values match, place the merchandise in the safe, vault, or under your showcases. This prevents merchandise from being inadvertently recounted or mixed into other categories.
Similar items are given the same SKU number and tracked by quantity. This is an acceptable inventory method.

Inventory numbers should be assigned in sequence by number, letter, or letter/number combination. The letter/number system allows you to identify your inventory by categories. For example, a gold chain could be CH100; a wedding ring could be WR100.

Inventory codes for categories
You can assign a code to each category of merchandise. Codes also can be used to refer to specific suppliers. Develop codes that are easy for you and your employees to understand and remember. To be effective, you must use these codes consistently. The following are commonly used codes and their categories:

- BRC Bracelets
- CHR Charms
- CL Clocks
- G Giftware
- EAR Earrings
- GT Gent’s jewelry
- F Mountings and findings
- NECK Necklaces
- CH Gold chains
- PD Pendants
- NECK Necklaces
- CS Stones (loose colored)
- D Diamonds (loose diamonds)
- WG Watches (gents)
- WL Watches (ladies)

You may need other categories or subcategories. For instance, under Category D, Stones (loose diamonds), you may want to add a separate listing for diamonds by clarity.

- D.0 Flawless
- D.1 Internally flawless
- D.2 VVS1
- D.3 VVS2
- D.4 VS1
- D.5 VS2
- D.6 SI1
- D.7 SI2
- D.8 I1
- D.9 I2
- D.10 I3

You could refine these subcategories further by including the color of the stones—which should be indicated regardless of clarity—in each subcategory:

- D.41 D
- D.42 E
- D.43 F
- D.44 G

Under each of these headings, you can list all diamonds of that color and clarity according to cut and carat weight.
Storing inventory records

Keep your inventory records for a minimum of seven years. If you have stock that is older than seven years, keep the inventory records for that stock until the items have been sold.

If you have a manual inventory system, keep your records separate from your merchandise to minimize the chance of your records being stolen. For a computer-based system, back up your files on removable media and store the media at a location away from your business.

Store your inventory records, including purchase invoices and sales receipts, in a fireproof container or safe that does not hold merchandise.

Keep copies of your two most recent annual physical inventories away from your business, such as at your home, a bank vault, or your accountant’s office.

Developing a perpetual inventory system

A perpetual inventory system tracks every item for sale, from the time you receive the merchandise until you are no longer responsible for it. Some items—such as low-valued merchandise, raw materials and parts, chains sold by the gram—have different record keeping requirements, which are described later in this guide under “Merchandise requiring special records.”

In conjunction with the perpetual inventory system, you should retain:

1. Purchase invoices
2. Sales receipts
3. Your annual detailed and itemized physical inventory

To track your merchandise effectively, maintain your perpetual inventory on a daily basis. In addition to keeping records of your own merchandise, keep an up-to-date detailed listing of:

1. Your customers’ goods, if you are a retail jeweler
2. Merchandise that belongs to others in the jewelry business (consigned or memo goods)
3. Items that are temporarily away from your business

Take a physical inventory at least once a year. If you update your records regularly, your perpetual inventory should match your physical inventory. Keep a copy of any adjusting entry necessary to balance the perpetual to the physical inventory.

Unique inventory numbering

Develop an inventory identification system that assigns a unique inventory number to each piece of jewelry. Even though two items may have identical makes and prices—for example, two watches—each should receive its own inventory number. One exception is computerized systems that inventory merchandise by using stock-keeping units (SKU).

<table>
<thead>
<tr>

<td>27 gm</td>
</tr>
</tbody>
</table>

Raw materials and parts

Raw materials and parts include precious metals, plate, tubing, shot, findings, unset mountings, and similar materials used to manufacture jewelry. It’s easiest to inventory this type of property by weight. As material is used, subtract the weight from the inventory. When new material is purchased, add the weight. Additions, subtractions and balances should be recorded daily, as shown below.

Type of metal: Gold, Inventory number: G-MR100

a. The total cost value of raw materials and parts, samples, finished goods, and merchandise
b. The value of raw materials and parts, samples, finished goods, and merchandise
c. The date the inventory was taken
d. The exact total value of all inventory items; not a rounded or estimated value. Inventory or jewelry lines carried by sales people must be included in the annual physical inventory

2. Maintain purchase invoices of raw materials and merchandise
3. Maintain sales receipts, which identify items sold by inventory numbers, descriptions, or some other method that will trace the items to the listing of the physical inventory and the original source documents (i.e., purchase invoices)

Depending upon your business, you should also keep a detailed list of merchandise that

- Belongs to others in the jewelry industry, and
- Is temporarily away from your business, whether in your possession or in the hands of an authorized party

Assign inventory numbers to your merchandise. Inventory numbers can be established as described on page 7. You can create inventory numbers of categories, such as type of merchandise (gold, loose diamonds, etc.) or supplier. Use a method that works best for your business.

Assign inventory numbers in sequence by number, letter, and or letter/number combination. Be sure to develop consistent codes that are easy for you and your employees to understand and remember.

Storing inventory records

.20 carats and more: Each stone should have an individual inventory number. See page 7 in this guide for information about establishing category codes. An example of recording merchandise by individual inventory numbers is shown below.

Inventory record keeping requirements

To comply with the inventory record keeping requirement of your Jewelers Block policy, you must do the following:

1. Take a **detailed and itemized inventory every 12 months**.
   Jewelers Mutual defines a detailed and itemized inventory as including, but not limited to:
   a. A listing that describes merchandise and links items to their original source documents (i.e., purchase invoices).
   b. The value* of each item at your cost.
   c. The date the inventory was taken.
   d. The exact total value of all inventory items; not a rounded or estimated value.
   e. The exact quantity (number of units or number of grams) of each item.

2. Maintain **purchase invoices** of all items.

3. Maintain a **record of the cost of component parts** for manufactured (assembled) items.

4. Maintain **sales receipts** that identify items sold by inventory numbers, descriptions, or some other method that will trace the items to the listing of the physical inventory and the original source documents (i.e., purchase invoices).

Sample inventory record format

With this information, you can maintain accurate inventory records. You can add other columns to your records if you feel it will help track merchandise. Additional columns could include manufacturing style number; manufacturer invoice number; type of metal (14K gold, platinum, silver, etc.); type and weight of stones; customer’s name; selling price of item; and method of payment.

* Throughout this guide, value is defined as your actual cost.
Inventory records checklist

This checklist will help you determine if your inventory records system follows the recommendations in this program. Consult your accountant for a thorough evaluation of your inventory records system.

- My inventory records contain a detailed listing of all owned stock for sale, customers’ goods, property of others (including customer, consignment, and memo goods) scrap gold and other metals and merchandise temporarily away from my store.

- I keep purchase invoices, sales receipts, inter-store transfer records, and an annual physical inventory list of all my stock.

- I maintain a perpetual inventory system or an equivalent system.

- I update my records regularly.

- I am exact and accurate in my record keeping.

- I perform a detailed and itemized listing of my physical inventory at least once a year. Inventory or jewelry lines carried by sales people are included in the annual physical inventory.

- My accountant has reviewed my inventory system.

- I store a copy of my annual physical inventory records off premises.

- For my computer-based perpetual inventory system, I back up my files on removable media and store the media at another site.

- If I use a manual perpetual inventory system, I keep my records separate from my merchandise.

- I store all of my records, including purchase invoices and sales receipts, in a fireproof container or safe that does not hold merchandise.

- I keep a copy of the physical inventory used to report inventory value on the Jewelers Pak application.

Record the lot of diamonds in your perpetual inventory as shown below.

<table>
<thead>
<tr>
<th>Date</th>
<th>In</th>
<th>Out</th>
<th>Bal.</th>
<th>Cost Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>9/3/yr</td>
<td>20</td>
<td>24</td>
<td>200.00</td>
<td></td>
</tr>
<tr>
<td>12/12/yr</td>
<td>3</td>
<td>21</td>
<td>1,200.00</td>
<td></td>
</tr>
<tr>
<td>(physical inventory)</td>
<td>12/31/yr</td>
<td>3</td>
<td>21</td>
<td>1,050.00</td>
</tr>
<tr>
<td>3/9/yr</td>
<td>27</td>
<td>48</td>
<td>2,400.00</td>
<td></td>
</tr>
</tbody>
</table>

Finished goods

Record all jewelry items that have been completely manufactured in the finished goods category. Assign an inventory number to each item. The following examples can be used to track custom-made items or similar items that are mass-produced. Your inventory records should include each item’s value, which includes cost of component parts and labor.

<table>
<thead>
<tr>
<th>Inventory #</th>
<th>Metal Price</th>
<th>DWT</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>100.00</td>
<td></td>
<td>400.00</td>
<td></td>
</tr>
<tr>
<td>75.00</td>
<td></td>
<td>75.00</td>
<td></td>
</tr>
<tr>
<td>TOTAL CASTING</td>
<td></td>
<td>67.75</td>
<td></td>
</tr>
<tr>
<td>Shop Labor</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>TOTAL LABOR</td>
<td></td>
<td>200.00</td>
<td></td>
</tr>
<tr>
<td>Diamonds and Stones</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Type</td>
<td>#</td>
<td>Carats</td>
<td>Price Per Carat</td>
</tr>
<tr>
<td>GSI Ideal</td>
<td>6</td>
<td>0.25 ea</td>
<td>825.00</td>
</tr>
<tr>
<td>TOTAL</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>TOTAL COST</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
When you manufacture a large quantity of an item and the cost of parts and labor have been recorded, keep a running inventory to track your merchandise as shown below.

Inventory number **ER456**

<table>
<thead>
<tr>
<th>Date</th>
<th>Description</th>
<th>Value at Cost</th>
<th>Units</th>
<th>Sale or Delivery</th>
</tr>
</thead>
<tbody>
<tr>
<td>1/1/1YR</td>
<td>Engagement Ring</td>
<td>4,000.00</td>
<td>5</td>
<td>6</td>
</tr>
<tr>
<td>3/10/1YR</td>
<td>Engagement Ring</td>
<td>5,900.00</td>
<td>5</td>
<td>Gold Mine, Inc.</td>
</tr>
</tbody>
</table>

When items are sold, record the inventory number on an appropriate sales form and delete the items from your inventory. (See page 9.)

Inventory number **ER456**

</tr>
</tbody>
</table>

**Merchandise temporarily away from your store**

Maintain a complete and separate inventory for items that are temporarily away from your premises, whether in your possession or in the hands of an authorized party, such as a commissioned salesperson.

Your inventory records can be recorded in the same manner as on page 11 of this guide.

Introduction

Jewelers Mutual Insurance Company developed *Inventory Records: It's good business* because proper inventory record keeping is a necessary tool for a jewelry business to be successful.

Taking the time to establish and maintain accurate and up-to-date inventory records will save you time and money in the event of an insurance claim. If you have a loss, your inventory records will prove what inventory has been lost and its value so that your claim can be settled quickly. If you can’t prove that missing items existed, the payment for your loss may be delayed or possibly denied. **In addition, inventory records are required by your insurance policy.**

Recovering insured losses isn’t the only reason to establish proper inventory records. Inventory records are useful in planning. They can indicate when to reorder merchandise and can help you know what’s selling and what’s not. Your records can also alert you to missing items and errors in entry, and they help deter internal theft.

This guide provides information for all segments of the jewelry industry. Because each jewelry operation differs in size, method of operation, and type of finished products, it’s difficult to recommend one inventory system that will work for every firm.

Work with your accountant to create an inventory record keeping system that works for your business. Computer-based inventory systems are affordable and easy to use.

If you have any questions or comments, please contact your agent or Jewelers Mutual’s Sales and Marketing Department.
